

PART 1: C-index (All Athletes)

Model discrimination | Higher = better | 0.5 = random

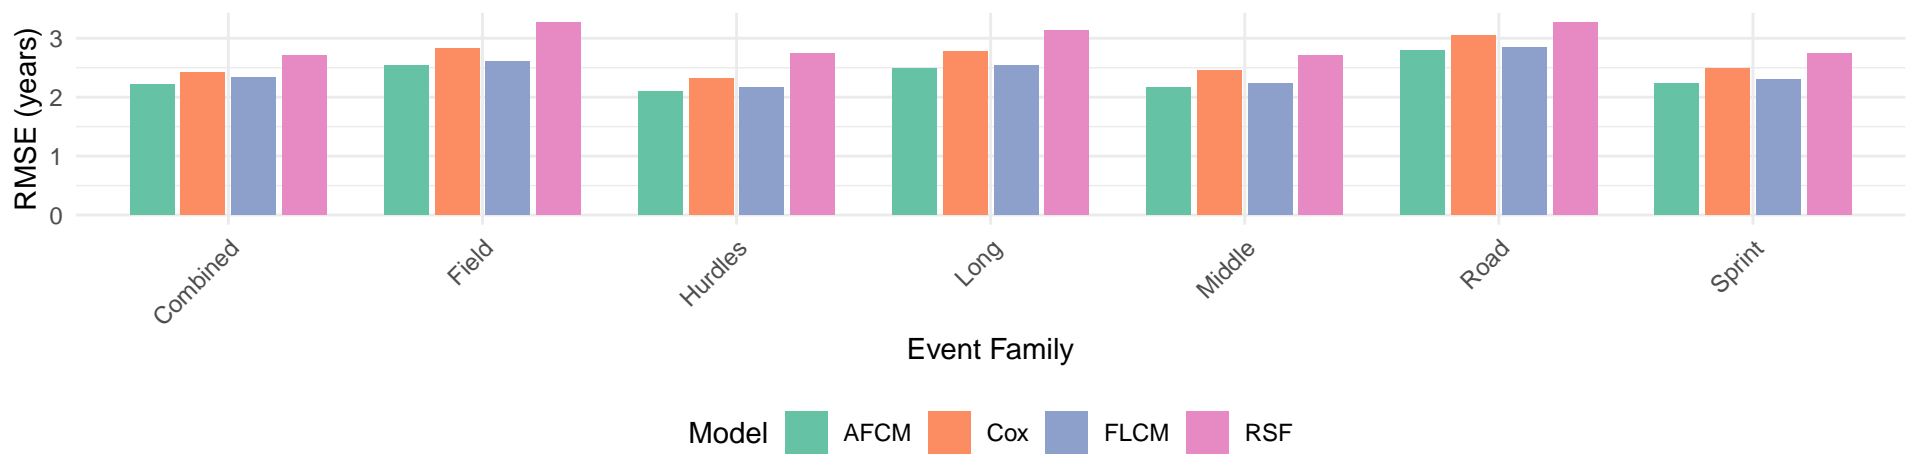

PART 1: Spearman Correlation (All Athletes)

Rank correlation | Higher = better

PART 2: RMSE (Uncensored Athletes Only) – Calibrated

Time-to-peak prediction error after GAM calibration | Lower = better

PART 2: MAE (Uncensored Athletes Only) – Calibrated

Time-to-peak prediction error after GAM calibration | Lower = better
